

Get creative this Christmas

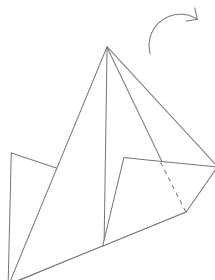

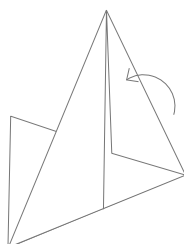

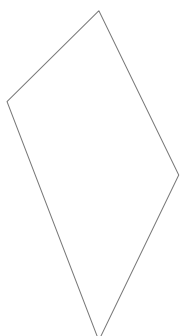

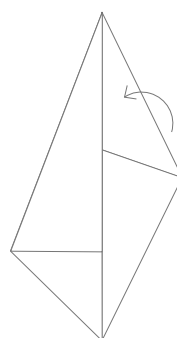

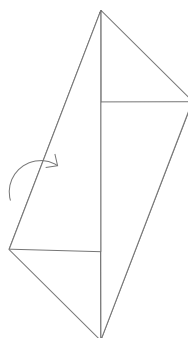

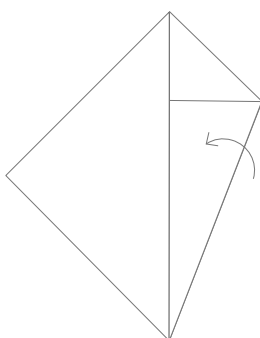

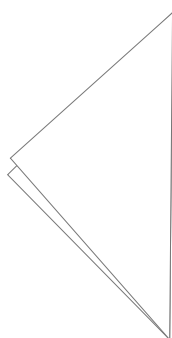

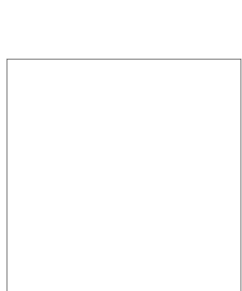

With HP Premium and
HP ColorChoice papers

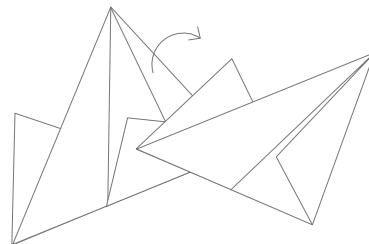

Template: 9 Pointed Star
Level: Difficult

Worth the effort, this detailed star adds a wonderful hand-crafted feel to your Christmas tree.

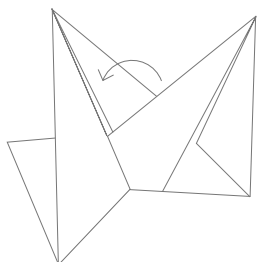

To create the 9 points you will need x9 square pieces of paper. As this is an intricate design, for the first time you make this decoration we recommend you begin with squares no smaller than 200mm x 200mm.

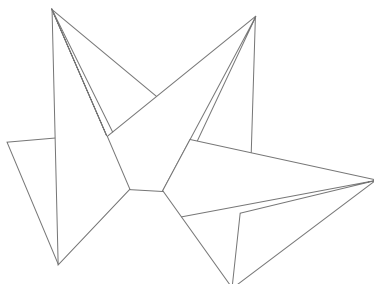

Open this flap. Repeat all steps to create the second point to your star.

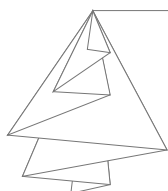

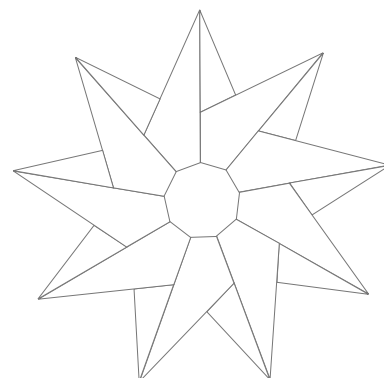

Insert the second point into the first point.

Close the opened flap on the first point to hold the second points in place.

Repeat this process until you have inserted together all 9 points.

TOP TIP

The stars look wonderful in white paper, but why not try printing off several patterns and mix together to create a really interesting design.
